

**Reminder: No Bin, No Barrel remains in full effect**

As the weather improves making it easier for residents to put out all their recyclables, the Department of Public Works wants to remind residents that the “No Bin-No Barrel” program established last September remains in full effect. The program requires residents to place both bins (blue and green) at curbside for regular trash to be collected.

Containers may be less than full but not empty of recyclable material and should not be retrieved until regular trash is picked up. Cardboard is picked up separately on your regular schedule. For a full list of rules and what’s recyclable, click the “No Bin-No Barrel” link on the right of the home page.
